# FIDO, Passkeys and the Future of Digital Identity

Wednesday, April 30 | 1:15 PM  
Moscone South 308

Join the FIDO Alliance and its industry stakeholders to learn about the latest developments in the global movement to passwordless technology for better security and user experiences. Attendees in this seminar will gain insights into the latest developments in FIDO and passkeys, focusing on enhancing account security while prioritizing usability. It will feature sessions on the state of passkey adoption and implementation best practices, related areas within the account lifecycle, such as identity verification, session security, and account recovery strategies, and touch on broader subjects, such as identity wallets.

This seminar is open to all RSAC pass types. We look forward to having you join us.

### Thank you to our seminar sponsors!

# Intro to FIDO Authentication and Passkeys

## What is the FIDO Alliance?

The FIDO Alliance is a global consortium that develops open, interoperable, and scalable standards for phishing-resistant authentication. Our mission is to reduce the reliance on passwords for authentication and provide simpler, stronger authentication methods that are more secure and convenient for users.

## What does the FIDO Alliance do?

The FIDO Alliance has three main activities:

### STANDARDS:

We develop open, interoperable, and scalable standards for phishing-resistant authentication.

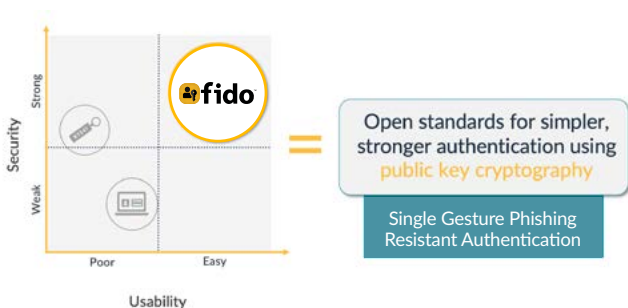

### MARKET ADOPTION PROGRAMS:

We promote adoption of these standards by collaborating with organizations across industries and work with them to improve the security of authentication systems.

### CERTIFICATION:

We certify to ensure products and services comply with FIDO standards and are interoperable with each other. This helps to improve the security and usability of authentication systems and provide users with a more consistent and reliable experience across different platforms and services.

**FIDO Authentication optimizes the balance between usability and phishing-resistant security.**

---

## Who makes up the FIDO Alliance?

The FIDO Alliance is comprised of a diverse set of companies and organizations that are dedicated and essential to achieving FIDO's mission. Members include organizations from industries including technology, finance, healthcare, government, security, e-commerce, and mobile network operators.

## What are passkeys?

Based on FIDO standards, passkeys are a replacement for passwords that provide faster, easier, and more secure sign-ins to websites and apps across a user's devices. Unlike passwords, passkeys are always strong and phishing-resistant.

## How do users use passkeys?

When a user is asked to sign-in to an app or website, the user approves the sign-in with the same biometric or PIN that the user has to unlock the device (phone, computer or security key). The app or website can use this mechanism instead of the traditional (and insecure) username and password.

## What do passkeys mean for...

### USER EXPERIENCE:

familiar, simple, and consistent across devices

### SECURITY:

phishing-resistant, password alternative for sign-in and account recovery

### SCALABILITY:

single enrollment for multiple devices, available anywhere

**Where can I learn more about  
FIDO and passkeys?**

**So glad you asked! Our website is  
a great place to start!**

**Also be sure to stop by our booth,  
#3210 in Moscone South!**

## Attend Authenticate 2025

October 13 - 15, 2025  
Carlsbad, CA

Join CISOs, business leaders, product managers, security strategists and identity architects at Authenticate to advance your knowledge of digital identity and authentication.

Authenticate brings together CISOs, business leaders, product managers, security strategists and identity architects to share expertise and get the tools to roll out passkeys, while gaining a deeper understanding of the technologies and approaches to secure the broader identity and access management lifecycle.

Now in its 6th year, the FIDO Alliance-hosted Authenticate Conference has become renowned for its high-quality content and vibrant community of professionals committed to advancing passkeys and related technologies to create a more secure web.

Join us at Authenticate 2025 and be part of shaping the future of digital identity and security.

**850+**

## Implementing Passkeys? Check out [passkeycentral.org](https://passkeycentral.org)

Passkey Central provides guides and resources to help you with implementation of support for passkeys: from research and planning to launch.

This site is intended to introduce people in all roles of an organization to passkeys, by guiding you through research and planning for the implementation of support for passkeys at your organization, providing helpful information to get you started, as well as resources to maintain passkeys after implementation.

This site offers multiple resources to help you on your journey to passkeys, including decision-making tools, videos, roll-out guides on implementation of support for passkeys, and metrics.

# Directory

---

## FIDO Members at RSAC

We've put together this directory to help you find and connect with attending FIDO Alliance members with certified products and services. Each entry describes the attending member company, what industries they serve, associated products, and how to get in touch. You can find more FIDO Certified members and products on the FIDO Alliance website at [www.fidoalliance.org/fido-certified-showcase](http://www.fidoalliance.org/fido-certified-showcase).

## THE MISSING PIECE TO YOUR FIDO STRATEGY

Axiad Conductor simplifies credential management:

- End-to-end lifecycle management of credentials
- Unified control of both passkeys and certificates
- Support and self-service for end users
- A customer-proven, enterprise-class solution

# Anonybit

---

## Anonybit

---

Anonybit enhances FIDO-based authentication by providing a decentralized infrastructure that protects biometric data in the cloud, ensuring privacy while enabling seamless passwordless login, step up authentication, account recovery and passkey storage and retrieval. Anonybit is FIDO certified, aligns with FIDO's principles of strong authentication and user control. This approach strengthens security against credential-based attacks while maintaining compliance with privacy regulations.

# More Than Hype. More Than Hardware. More Than 30 Years of Trust.

- ✓ Hybrid, Mobile & Hardware Authentication
- ✓ Future-Proof, Regulatory-Ready
- ✓ Purpose-Built for Financial-Grade Security

Authentication isn't one-size-fits-all. That's why OneSpan delivers the widest range of multifactor authentication options through its world leading DIGIPASS solutions, from FIDO2-enabled security keys to specialized hardware authenticators for digital banking security to mobile authentication software rolled out to over 300 million end-users globally.

We've spent 30+ years protecting the world's most critical transactions. OneSpan sets the standard for strong, scalable security trusted by 60% of the world's largest banks, processing billions of authentications each month.
